Office Action Summary	Application No. 10/046,498	Applicant(s) TANEDA ET AL.	
	Examiner Kenneth L. Bartley	Art Unit 3693	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-15 have been examined.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

4. The disclosure is objected to because of the following informalities: the sentence "It is possible make this confirmation..." is missing the word "to" in para. 56.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Pub.

No. US 2001/0037316 to Shiloh.

7. Regarding applicant claims 1-15, Shiloh discloses:

- a. A communication network that includes the Internet, intranets, and local networks (bottom of para. 18);
- b. A real entity represented by a virtual entity "...with an imaginary name, an imaginary address, a virtual social security number, and any other data that may be required for the Internet activity of the virtual entity." (middle of para. 20);
- c. A computer system that manages both the real and virtual person (para. 21 and para. 25), and provides a link between the virtual user and the real user (bottom of para. 27);
- d. Ability to conduct commercial transactions on the Internet using a "virtual personality" (para. 22);

Art Unit: 3693

- e. Shipping items to a real address based on a virtual transaction (middle of para. 31) by a virtual entity;
 - f. The ability of a virtual person to authenticate (confirm) a transaction on the Internet using a fictional user name and information (middle of para. 26);
 - g. The user logs into a site by "...presenting the virtual user access ID and virtual user access password..." to gain access to their virtual identity (para. 85);
 - h. A virtual entity may obtain a virtual debit and credit card number (para. 20);
 - i. Virtual users are able to make purchases of goods, presumably from virtual stores (middle of para. 31);
 - j. Users can have personalized virtual home pages that serve as "homes" for the virtual entities (middle of para. 35) and a "...virtual entity may enter a chat room and interact with other real and/or virtual entities." (para. 20);
 - k. The system "...may be an organization operating a server site or series of server sites providing access to the Internet and/or other services..." (para. 21).
- Therefore, while "virtual station" and "virtual city space" are not discussed, Shiloh has the capability of offering it in that they provide virtual address information and provide management of the system. Also, entities can change personalities, which would include their virtual address (para. 23).
